

UNIVERSIDAD
DE GRANADA

Gabriel Maciá Fernández

Gabriel Maciá Fernández is an associate professor in the department of [Signal Theory, Telematic and Communications](#) of the University of Granada. He is a member of the [Network Security and Engineering Group \(NESG\)](#).

He received his M.S degree in telecommunications engineering from the University of Seville (Spain), in 1998. After that, his professional activities were developed in some technological companies (Enditel - Endesa, Vodafone S.A), where he worked for 7 years.

He joined the [University of Granada](#) in 2005, and received a Ph.D. in telecommunications engineering from that university in 2007, with the thesis titled (english translation) "Low-rate Denial of Service Attacks against servers".

His research activities are focused in the network security field. Specifically, he is interested in the study of the attack generation methodologies, denial of service attacks, and techniques for intrusion detection systems (IDS).
